

# Our Story

2021 - 2022

**The class of 2022 proudly has dedicated this yearbook to Ms. Marcus. Ms. Marcus is our class advisor, and has been our science teacher since we arrived at PHS. Aside from being an outstanding teacher, she is a support system to all of us, and is always there to lend a helping hand. She has helped each and everyone of us grow as people and as students. Ms. Marcus constantly gives us advice and is there whenever we need to vent, even if she has to remind us at times that she is still our teacher and we need to respect those around us. She has helped shape us into the young adults we are today and we are beyond thankful for her being the person she is in each and every one of our lives.**

**A truly amazing teacher is hard to find, difficult to part with and impossible to forget. Ms. Marcus you will forever be remembered by the class of 2022 as a teacher who has inspired us to be teachers, nurses, stuntmen, carpenters, physical therapists, explorers, police officers, involved in the military, employees, students, athletes and so much more. But above all of this, you have inspired us to become better people....always trying to be better than the person we were yesterday.**

# Stafford Students

Thomas Pecor stands in front of one of the bike racks that he helped design and fabricate in the Welding program for the R.H.S Eco club.

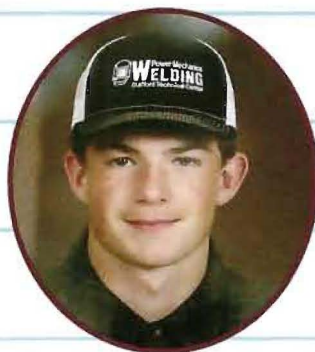

Meghan Cole is in the Health Careers program and she chose this program because it has helped her become a Licensed Nursing Assistant, it also has helped her understand that everyone is different and no matter the situation you need to be open and understand others better.

Hunter Bridge decided to attend the Electrical and Plumbing Program at Stafford his senior year. He is able to explore careers in these fields first hand while working at the residential building project. He plans to obtain a plumbing apprenticeship after graduation.

Cameron Cannucci has always wanted to go into Welding since he was in elementary school. Since September 2021, he has been in the Welding Program and learned how to Stick, Mig and Tig Weld. He surpassed where he needed to be at a first year level by getting a 3G 1 inch certification.

Shelby Moody is studying human services. She is doing a community service project for our first responders and nursing homes for the holidays. She came to this program to learn about children. Her goal is to become a pediatric nurse so being in the preschool environment shows her the ways kids act and how to handle them. This program is a great opportunity and she would recommend it to anyone who loves kids and wants to work with them.

Brighton McKeighan's passion is Auto body & Mechanics. Being at Stafford has enabled him to earn high school credits, all while doing something he loves to do. He's learning skills he will actually use towards his future goals. At Stafford, he does not feel stuck, struggling in the classroom at a desk all day, trying to learn something that he won't use as an adult. He is excited for the co-op/work study he will be able to do.

Brennen McKeighan is studying Auto body & Mechanics. He is learning about things he enjoys and things he is really good at. He will be doing a co-op/work study. Thanks to this program he is able to earn an income, while at the same time earning credits for high school. After experiencing school at Stafford, he can't imagine doing his high school years any other way.

## Peer Leaders

Senior High Peer Leaders are a small group of students who try to make a positive difference in our school and community. Our mission is to make people smile, spread some love and enthusiasm within our building and to serve those who need extra help in trying times. Student Council is a small group of students who are amazing role models, with kind hearts. These students are given the opportunity for experience in leadership, encourage relationships within the school community, and promote citizenship. This year they hosted School Choice week for the first time, and helped with the wrapping of gifts for our Christmas families. They also received donated items from the mitten tree that were taken to the New Story Center for families of domestic abuse.

## Mentor Program

The Mentoring program pairs upperclassmen with underclassmen to attend, and where possible, participate in special activities with underclassmen by being exposed to various school events and gain a better understanding of school culture. By attending meetings as a group on campus, students will be better equipped to make decisions about their personal interests in involvement in the school community through developing relationships with each other.

The rock climbing club had 3 competitions this year at the Green Mountain Rock Climbing Center. The 7 teams were split into 2 groups in order to limit crowding in the gym and reduce the risks associated with COVID-19. To accommodate this change, the number of competitions was reduced from twice a month to once a month. Masks were required and spectators were not allowed. The state championships were held in March. Congratulations to this team for coming in 6th place overall this year.

## Member to Member

Brighton and Brennan McKeighan played football for Otter Valley

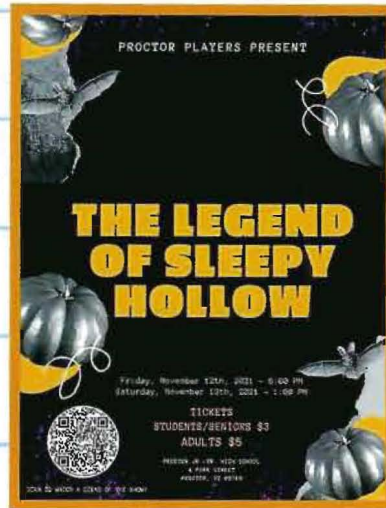

Proctor High School has a long standing tradition of putting out strong sports teams. However, being a small school, the options are limited and what is available isn't for everyone. Some students opt to participate in a member to member agreement with another area school that offers the sport they are passionate about. Proctor has had students participate in cross country running, track & field, cheerleading, football, baseball and softball.

The Varsity Boys basketball season was filled with ups and downs. COVID was its number one enemy this season making it a challenge to have the entire team at practices and games. However, this is a team with a lot of talent, depth and fight. Despite being hit hard during the pandemic, this team took home 2 trophies this season.

The JV Boys team had to share a number of their players not only with the Varsity team but with the Junior High team as well. This team played hard and showed signs of a roster full on players with potential to become strong contributing members to the varsity team down the road. The future of Phantom basketball is very bright.

The JV Girls pulled up 8th graders to form a team. They only had a few games due to the lack of JV teams in the area but they worked their hardest in every game. Despite rarely practicing together they got in the groove of playing together and had a great season.

Several members of the Jr High Boys basketball team have played together since 5th grade. This team has worked hard on improving their skills and learning new plays. They have enjoyed a number of wins and have used their losses to improve their game. They ended their season with a 7-5 record. This is a team that will be very exciting to watch play as they make their way up into high school. Wrapping up the junior high careers are 8th graders; Isaiah, Scooby, Aaron, Jayce, Chase and Kaden.

Many teams have had to deal with numbers problems due to COVID. The Jr High Girls basketball team was no exception. Playing some games without any subs (and even ending one game with only 4 players due to one fouling out) this team continued to push forward and play hard, never giving up. A true example of perseverance.

The sophomores were in blue playing against the Freshmen in pink. The Eighth graders in maroon played the Seventh grade in white. The day ended with a dance competition. It was an up and down season for the boys. This year's team was very young but we saw a ton of growth and improvement throughout the season. The boys had no seniors so Coach Patch has the whole team returning next year with high expectations. The future is bright for Proctor Baseball.

Varsity Softball completed its season with an impressive 14-1 record, top seed in Division 4. They overwhelmed competition all year with balance & depth. They got great pitching, steady defense, speed on the base paths, and the lineup was dangerous from top to bottom. As balanced and as dominating of a team as we've seen in a long time here in Proctor. Cadence also got her 100th strike out.

At the end of the fall and spring semesters, the faculty and staff recognized students for their excellence in enthusiasm, leadership, effort and habits of work.

Spring MAPS prizes were raffled off to recognize students who have shown growth or maintained their high marks. The overall final raffle winners were drawn at the assembly on the last day of school. Roy Gee and Andrew Lee were the lucky recipients. Congratulations to them both!

How in the world did we get from diapers to driving and now graduating so fast?! You've created countless firsts for us. This next step is a big one but you are ready! You are a natural leader and protector and that will serve you well provided you don't ignore those pesky red flags that pop up; pay attention because they help guide you. Move forward with confidence knowing we're supporting you every step of the way and don't forget to always find a reason to smile! Perhaps most importantly... keep the smolder alive!

Love you!

Mom and Dad

## Ashley

# Maggie

You are one of a kind. Growing up the youngest in a house full of very intelligent, extremely active, superstar athletic siblings, you have more than held your own. You have excelled in academics, making the President's List every quarter since the 7th grade. You are a superstar 3 sport athlete, continuously being an "All League" or "All State" selection in all 3 sports. Also, being the Rutland Herald's selection as "Athlete of The Year" twice. You are involved as a Class officer and peer leader. And as a 3 sport captain, you have become an excellent leader to your younger teammates. Additionally, you fill in as public address announcer, clock keeper, and official for school sporting events. And in your spare time, you have been a lead singer in the rock band and, also an entertaining actress in many school plays, including "Peter Pan" and "The Wizard of OZ". You are a very creative artist and poet, often bringing a big smile or sometimes "happy" tears to the recipient's face. And in the kitchen, you and your boyfriend are always baking or cooking something yummy or creating a holiday gingerbread house, with it's own tree. You have a personality of your own. Friendly, smiling, you have your own ideas and you are not afraid to express them. Just an all-around good kid. Everyone should have a friend (or granddaughter) like you.

Very proud of you,  
Love,  
Grammy and Pa

Congratulations Maggie! Your time in high school has been filled with all kinds of amazing moments and success, from being the lead in plays, winning state titles, scoring over 100 goals in soccer, it really has been special. The best is yet to come, we can't wait to see what the next chapter holds for you. We love you so much, and will always be right here supporting you, dream big.

## HOW PROPANE IS FIGHTING CLIMATE CHANGE

The world loses an area of forest equal to the size of Connecticut, New Hampshire and Maine each year. The vast majority of this deforestation occurs in Latin America, Southeast Asia and parts of Africa, where wood is used for heating and cooking. Around the world, the switch to clean and portable propane stoves is projected to save millions of trees and millions of tons of CO<sub>2</sub>. *For every 50 families that switch from wood to propane cooking, one acre of global forestland is preserved!* As Vermont increases its use of wood as a renewable this should be a concern for us as well.
